Rely on us for...

Trusted Advisors

Our knowledgeable team can assist in navigating today's changing health care landscape through:

- Revenue Enhancement
- Cost Containment
- Staff Training and Support
- Practice Education
- Technology

Price Integrity

We are highly competitive with our pricing and strive to maintain prices through the development of purchasing plans, GPO programs, and by delivering the best value for your practice.

Guaranteed Fast Delivery

*Orders received by 5 PM local time are shipped the same day.
Your products arrive within 24-48 hours in most areas.*

Vaccines, Pharmaceuticals, and Diagnostics

We supply every adult and pediatric vaccine recommended by the ACIP. In addition, we can fulfill your flu vaccine needs with our Worry-Free Guarantee Influenza Vaccine Program. Our pharmaceutical and diagnostic solutions include brand names, a complete line of generics, and Henry Schein Brand options.

Practice Solutions

A complete array of services, from Technology Solutions to Practice Marketing, is available to help you achieve your practice goals.

Highlights

Diagnostics and Laboratory 2-13

Pharmaceuticals and Vaccines 14, 17-19, 20-22

Hypodermics..16, 24, 37

Infection Control 24, 26-30

Wound Care/Closure 32-34, 36

Equipment 40-44

Henry Schein Cares

We are helping health happen by expanding access to care for at-risk and underserved populations.

In 2013, our Healthy Lifestyles, Healthy Communities program provided free health screenings to 7,500 children and their caregivers in 14 U.S. cities.

We are planning for our 2014 screening events and we need your support to continue our program.

To make a donation or learn more about our programs, visit: www.hscaresfoundation.org

Medical Tip: Start the New Year Right!

ALL AEDs need to be checked annually to ensure batteries and pads are up-to-date.

**Do you currently have an AED in your office?
When was the last time you checked the batteries and pads?**

NOW is the time to check your batteries and pads.

Call your Sales Consultant for details.

HENRY SCHEIN®
BRAND PRODUCTS

NO AGE INDICATIONS!

HENRY SCHEIN®
ONE STEP PRO+ MONONUCLEOSIS TEST KIT

- CLIA waived for whole blood
- No age restrictions
- Measures heterophile antibodies in whole blood, serum and plasma
- Uses best technology of bovine derivatives, which eliminate cross reactivity
- Room temperature or refrigerated storage
- Two internal controls exist to avoid additional cost and ensure good laboratory practice
- Only 25 µL blood needed
- **Made in the USA**

Mono Test Kit
(112-5547) 20/box

Contains: 20 test devices, 1 developer solution, 1 negative control, 1 positive control, 40 sample transfer pipettes (20 for serum/plasma & 20 for whole blood), 1 procedure card & 1 package insert.

CPT® Codes: 86308QW† (Whole Blood) / 86308† (Serum/Plasma)

HENRY SCHEIN®
ONESTEP+ STREP A TEST STRIPS

- CLIA-waived
- Room-temperature storage
- Canister packaging for ease of multiple testing
- Walk-away procedure

(107-4050) 25/box

CPT® Code: 87880QW†

HENRY SCHEIN®
ONESTEP+ MONO CASSETTE TEST

A rapid chromatographic-immunoassay for the qualitative detection of infectious mononucleosis in whole blood, serum, or plasma.

- CLIA waived
- Finger stick or collection tube
- Room-temperature storage
- Includes controls

Complete Kit
(900-4070) 20/box

Contains: 20 pouched test devices with disposable sample droppers; disposable, heparinized capillary tubes with dispensing bulb; 1 of each control (positive & negative); 1 sample buffer; 1 procedure card & 1 package insert.

CPT® Code: 86308QW†

NEW!

HENRY SCHEIN®
ONESTEP+ STREP A CASSETTE KIT

- CLIA-waived
- Easy-to-use flip design; all-in-one extraction, incubation, and test
- Results in 5–10 minutes
- Sensitivity of 96.2% and specificity of 98.7%
- External negative and positive controls included
- **Made in the USA**

(900-7570) 25 tests/kit

CPT® Code: 87880QW†

HENRY SCHEIN®
ONESTEP+ INFLUENZA A & B TEST

This test provides a simple, rapid method to aid in the differential diagnosis of influenza A & B using nasal swab specimens.

- CLIA waived
- 10-minute results
- Sensitivity (A/B): 93.8%/77.4%
- Specificity (A/B): 95.8%/98%
- **Made in the USA**

#1126219, Influenza A & B Test

BIG REVOLUTION

*It will change
the way you view
rapid testing...*

- **Proven Performance vs PCR —**
PCR is currently the highest sensitivity standard available
- **Reproducibility You Can Count On —**
Unique Adaptive Read Technology helps reduce false-positive results

- **Results You Can Trust—**
Easy-to-read digital display eliminates subjective interpretation
- **Convenient Workflow—**
Testing requires minimal hands-on time

SIEMENS Clinitek Status+ Urine Analyzer

Provides convenient point-of-care testing with improved data integrity for more confidence in the results. Simple, fast, and accurate testing produces a result in about 60 seconds. Status analyzer can process basic urine strips, ratio tests, and hCG cassette tests. Full alphanumeric keyboard, easy-to-use touch-screen display, and automatic strip identification make this unit convenient to use. Eliminates need for visual reading, timing errors, and transcription errors. Memory to store 950 patient records. Future-ready for EMR when you are.

#1780
(795-0055) ea

SIEMENS Clinitek® Microalbumin Test Strips

- CLIA waived on CT status analyzer
- Dip-and-read test for albumin and creatinine in urine
- Determines an A:C ratio for greatest accuracy
- Use a random urine sample—reduces need for a 24-hour collection
- Timeframe: 60 seconds
- **Made in the USA**

#2083
(147-4712) 25/btl

*6-minute results for hs-CRP.

**Except hs-CRP.

Alere™ INRatio2® Monitor

Allows you to obtain a prothrombin time (PT) and international normalized ratio (INR) result using 1 drop of blood from a fingerstick.

- CLIA waived
- Easy to use
- Single-button operation
- 1-step auto turn-on with strip insertion
- Larger LCD screen and easy-to-read digits
- Small, 1-drop (15 µL), sample size
- Wider test-strip area for easier sample application
- Test results in under 1 minute
- Test strips do not require refrigeration
- 2-channel, on-board quality control runs on every test
- No need for external liquid quality control or extra strips
- Test strips are individually wrapped and stored at room temperature

INRatio2 Professional Monitor Kit

(111-3837) ea

#INR2QS1 Quick Start #1

(111-3840) ea

Contains: analyzer, 1 box of 48 INRatio test strips, 50 Unistik® single-use lancets, 100 alcohol pads & 250 gauze brick pads.

#INR2QS3 Quick Start #3

(111-3844) ea

Contains: analyzer, 3 boxes of 48 INRatio test strips (144 total), 150 Unistik® single-use lancets, 200 alcohol pads & 250 gauze brick pads.

#INR2QS5 QuickStart #5

(111-6578) ea

Contains: analyzer, 5 boxes of 48 INRatio test strips (240 total), 250 Unistik® single-use lancets, 300 alcohol pads, 5 boxes of capillary tubes & 500 gauze brick pads.

#INR2-6PK 6-Box Promo

(112-3230) ea

Contains: analyzer, 6 boxes of 48 INRatio test strips (288 total), 10 single-use lancets & 10 capillary tubes.

CPT® Code: #85610QW†

Alere™ Triage® MeterPro™ Meter

High-performance, comprehensive cardiovascular and drugs-of-abuse testing in the laboratory or at the point of care (POC). Designed to provide diagnostic results quickly and easily. Quantitative diagnostic panel results are displayed and printed in easy-to-read numbers and highlighted when the result is above the cutoff. Qualitative diagnostic panel results are displayed as positive (POS) or negative (NEG), eliminating the need for interpretation of lines that often hamper qualitative diagnostics.

- 16 immunoassays available
- Results in about 15 minutes
- Whole blood, plasma, or urine
- Customizable test panels
- Onsite training and implementation support
- Results printed, displayed, and interfaceable
- Full connectivity support

#55070MP
(496-3405) ea

#52031, Paper for Triage Meter and MeterPro, 1 Roll
(111-6321) ea

Alere™ Triage® BNP Test

The only CLIA-waived blood test measuring B-type natriuretic peptide (BNP). Cardiac hormone produced by the heart ventricles in response to ventricular volume expansion and pressure overload. CLIA waived for use with whole-blood samples. Rapid, objective point-of-care immunoassay is used:

- As an aid in the diagnosis and severity of CHF
- For the risk stratification of patients with ACS and HF
- Made in the USA

#98010XR, Triage BNP Test

Roche

CoaguChek XS® System

PT/INR Monitoring Solution

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed
- **Made in the USA**

XS® System

(891-0581) ea

Strips For XS and XS Plus Meters

(891-7593) 48/box

Contains: 24 strips per bottle, 2 bottles per box.

3-Box Starter Kit

(108-1861) ea

Contains: XS Analyzer, 3 boxes of CoaguChek XS PT strips (144 total) & CoaguChek Lancets.

5-Box Starter Kit

(108-7757) ea

Contains: XS Analyzer, 5 boxes of CoaguChek XS PT test strips (240 total) & CoaguChek Lancets.

10-Box Starter Kit

(108-2228) ea

Contains: XS Analyzer, 10 boxes of CoaguChek XS PT test strips (480 total) & CoaguChek Lancets.

Roche

Accutrend® Plus Meter Kit

- CLIA waived
- Stores 100 results for each parameter (glucose and cholesterol)
- Out-of-meter dosing
- Onboard QC
- Positive strip lot ID
- Fast, reliable results
- Portable
- Room-temperature storage
- **Made in the USA**

Complete Kit

#5346754160

(891-1038) ea

Contains: 1 meter, 4-1.5-V AAA alkaline batteries, 1 user's manual, 1 quick-reference guide, 1 carrying case & 1 warranty card.

Cholesterol Test Strips

#5213312160

2.9% low sensitivity.

173-224 mg/dL range.

(891-1036) 25/pkg

Contains: 25 strips per vial & 1 code strip.

ABX Pentra 400 Analyzer Clinical Chemistry System

A compact, benchtop, clinical chemistry analyzer. Its autonomy and continuous loading provide enhanced productivity in a user-friendly environment. This very precise optical system meets the requirements of highly accurate photometric measurement. An extensive panel of liquid reagents simplifies workflow. Horiba presents a range of ready-to-use reagents in a single format.

- Up to 420 tests per hour with the ISE module
- 55 on-board assays with backup availability
- Save valuable time: control all of your operations from the main screen (system, reagent, and sample status), and easily upload target values for calibrators and controls
- Secure data management: Westgard multirule QC procedures with up to 3 default controls, full QC program stores up to 12 months of control history, Levey-Jennings, and statistics
- Conduct high-quality analysis: single-use reaction cuvette performs sensitive tests and all latex assays, high-performance mixer design mixes in minimal time without contaminating, and test-sequence setting program features an incompatibility function
- Control cost: optimized number of tests per cassette and limited calibrations

UNICO®

G508 Binocular Polarizing Microscope

Full-featured and LED-illuminated, G500 polarizing microscopes are designed with a round, 360° rotating stage, graduated in 1° increments, with filters for a full crystal visualization. G500s feature a unique combination system of a graduated iris diaphragm mounted in the condenser, paired with a graduated Koehler field iris built into the illuminator housing. These features, along with an intensity rheostat, allow for maximum illumination control. Polarization system consists of a 360° rotatable analyzer, 3 compensator plate sliders (gypsum, mica, and quartz), and a 90° swing-out intermediate tube analyzer.

Features:

- Polarization system: Polarizer, analyzer, 3 compensator plates, and a 90° swing-out intermediate tube analyzer
 - Included accessories: Dust cover, 2 extra fuses, neutral density filter, and operation manual
 - Control slide: Includes urate (uric acid) crystal control slide, specifically designed to assist in proper setup of the polarizing microscope and as a urate crystal control to assist in confirmation of results
 - Warranty: 5-year limited warranty, 1-year on electrical system; excludes bulbs and fuses
- (119-5042).....ea

UNICO®

IP730 Series Microscopes

Designed to provide crisp, clear imaging on a versatile and ergonomic platform. Available with 30° inclined binocular or trinocular heads. Features Seidentopf optical design with 55mm–75mm interpupillary distance adjustment. Both heads rotate 360° and lock in place with a thumbscrew. Eyepieces are standard with 10x 22mm extra-wide field eyepieces for viewing comfort and clarity.

UNICO®

DermaScout™

The NEW DermaScout is a quick, easy, and efficient way to view and measure skin lesions, moles, and other dermatological conditions. Use the built-in measuring scale.

- 6X magnification with 40-mm top lens
 - 40-mm field of view (flat field)
 - LED-illuminated with an array of 9 LEDs
 - Reticule dual measuring scales: mm and inches
 - Measures in 0.1-mm increments and 0.005" increments
 - Diopter focus control for sharp focusing
 - 31-mm working distance
 - Battery-powered; over 150 hours
 - 20 mm: 10 left of center/10 right of center
 - Battery included; (Repl.: CR2, 3 V)
 - Storage/transport case
- (715-0000).....ea

UNICO®

PowerSpin™ LX Centrifuge

Spin blood, urine, fecal materials, or semen at the best speed for each type of specimen with this powerful, variable-speed, 6-place centrifuge. Maintenance-free, brushless motor runs quietly at a fixed speed up to 4000 rpm, emitting only 58dB, all with low-temperature rise. Suction-cup rubber feet hold unit firmly in place and virtually eliminate vibration. Lid features a gasket to reduce aerosol emission, a window for strobe speed check, and a safety interlock switch that cuts power to the motor if lid is raised. Angled rotor accepts 2–10-mL tubes (maximum tube size 16 mm x 110 mm). Accessories available upon request: 8-place rotor and pediatric tube adapters.

- Speed range: 300–4000 rpm, generating up to 1850 RCF (g)
- 30-minute timer
- 1-year warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

#C-856, Variable Speed, 6 Place
(715-2656).....ea

UNICO®

Slide Staining Rail

- Durable stainless-steel construction
 - 24"-long rails hold up to 22 slides
 - Fits sinks or trays up to 21" wide
 - Stain, rinse, drain, and dry quickly and easily
 - Measures 1"H x 24"W x 3½"D
- (111-7762).....ea

UNICO®

Slide Drying Rack

- Dry and organize up to 30 slides at a time
 - Space-saving design, small footprint
 - Organize slides in rows: 6 rows of 5 slides
 - Measures 2½"H x 8½"W x 5"D
- (111-7667).....ea

UNICO®

PowerSpin™ FX Centrifuge

Features a 6-place angled rotor designed for 2–10-mL tubes (maximum tube size up to 16 mm x 110 mm) and a fixed speed of 3400 rpm, generating 1350 RCF (g) for superior specimen separation. Set the 0–30-minute timer to desired run length.

- Maintenance-free, brushless motors run quietly at a fixed speed of 3400 rpm, emitting only 58dB, all with a low temperature rise
- Suction-cup rubber feet hold unit firmly in place while virtually eliminating vibration
- Lid features a gasket to reduce aerosol emissions, a window for strobe speed checks, and a safety interlock switch that cuts power to motor if lid is raised
- Accessories available upon request: 8-place rotor and pediatric tube adapters
- 1-year manufacturer's warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

For Rh-negative patients

Protection that stands the test of time

RhoGAM® Brand aligns with ACOG and AABB recommendations^{1,2,3}

This chart shows that the mean elimination half-life of RhoGAM® Brand exceeds the half-life on which the ACOG (American Congress of Obstetricians and Gynecologists) and AAB (American Association of Blood Banks) dosing guidelines were based.

During the critical prenatal time

- All Rh-negative expectant moms must be protected from Rh sensitization
- Risk of sensitization increases as pregnancy term progresses¹
- The greater the half-life of an anti-D product, the more anti-D that is present at pregnancy term

Consider the importance of time

- RhoGAM® Brand has a mean elimination half-life of 30.9 days³
- ACOG dosing recommendations are based on a 24-day half-life¹
- AAB dosing recommendations are based on a 25-day half-life²

RhoGAM®
Ultra-Filtered PLUS
Rh(D) Immune Globulin (Human)

Important Safety Information

RhoGAM® and MICRhoGAM® Ultra-Filtered PLUS Rh(D) Immune Globulin (Human) are made from human plasma. Since all plasma-derived products are made from human blood, they may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. RhoGAM® and MICRhoGAM® are intended for maternal administration. Do not inject the newborn infant. Local adverse reactions may include redness, swelling, and mild pain at the site of injection and a small number of patients have noted a slight elevation in temperature. Patients should be observed for at least 20 minutes after administration. Hypersensitivity reactions include hives, generalized urticaria, tightness of the chest, wheezing, hypotension and anaphylaxis. RhoGAM® and MICRhoGAM® contain a small quantity of IgA and physicians must weigh the benefit against the potential risks of hypersensitivity reactions. Patients who receive RhoGAM® and MICRhoGAM® for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

Please see next page for Brief Summary of RhoGAM® Brand Prescribing Information. For Full Prescribing Information, visit www.RhoGAM.com

KEDRION
BIOPHARMA

Rh₀(D) Immune Globulin (Human)

RhoGAM® Ultra-Filtered PLUS (300 µg) (1500 IU)

MICRhoGAM® Ultra-Filtered PLUS (50 µg) (250 IU)

Rx Only

For Intramuscular Injection Only

Prefilled syringes, preservative-free (thimerosal free), latex-free delivery system

INDICATIONS AND USAGE

Pregnancy and other obstetrical conditions

For administration to Rh-negative women not previously sensitized to the Rh₀(D) factor, unless the father or baby are conclusively Rh-negative.

- Delivery of an Rh-positive baby irrespective of the ABO groups of the mother and baby
- Antepartum prophylaxis at 26 to 28 weeks gestation
- Antepartum fetal-maternal hemorrhage (suspected or proven) as a result of placenta previa, amniocentesis, chorionic villus sampling, percutaneous umbilical blood sampling, other obstetrical manipulative procedure (e.g., version) or abdominal trauma
- Actual or threatened pregnancy loss at any stage of gestation
- Ectopic pregnancy

To maintain an adequate level of anti-D, RhoGAM should be administered every 12 weeks. If delivery of the baby does not occur 12 weeks after the administration of the standard antepartum dose (at 26 to 28 weeks), a second dose is recommended to maximize protection antepartum.

Transfusion of Rh-incompatible blood or blood products

- Prevention of Rh immunization in any Rh-negative person after incompatible transfusion of Rh-positive blood or blood products (e.g., red blood cells, platelet concentrates, granulocyte concentrates)

CONTRAINDICATIONS

- The use of RhoGAM and MICRhoGAM is contraindicated in Rh-positive individuals.

DOSAGE AND ADMINISTRATION

For intramuscular use only, do not administer intravenously.

Pregnancy and other obstetrical conditions

- RhoGAM (300 µg) (1500 IU)
- Postpartum — if the newborn is Rh-positive. Administer within 72 hours of delivery.
- Antepartum —
 - Prophylaxis at 26–28 weeks gestation.
 - At or beyond thirteen weeks gestation: administer within 72 hours when suspected or proven exposure to Rh-positive red blood cells occurs resulting from invasive procedures, abdominal trauma or obstetrical manipulation, ectopic pregnancy, pregnancy termination or threatened termination.

Administer every 12 weeks starting from first injection to maintain a level of passively acquired anti-D. If delivery occurs within three weeks after the last antepartum dose, the postpartum dose may be withheld, but a test for fetal-maternal hemorrhage should be performed to determine if exposure to >15 mL of red blood cells has occurred.

MICRhoGAM (50 µg) (250 IU)

- Administer within 72 hours of actual or threatened termination of pregnancy (spontaneous or induced) up to and including 12 weeks gestation.

Transfusion of Rh-incompatible blood or blood products

Administer within 72 hours.

- RhoGAM (300 µg) (1500 IU)
- 2.5–15.0 mL Rh-positive red blood cells
- >15.0 mL Rh-positive red blood cells (multiple syringes)
- MICRhoGAM (50 µg) (250 IU)
- <2.5 mL Rh-positive red blood cells

WARNINGS AND PRECAUTIONS

Warnings

- For intramuscular use only, do not inject intravenously.
- In the case of postpartum use, the product is intended for maternal administration.
- Do not inject the newborn infant.
- Patients should be observed for at least 20 minutes after administration.
- Administer with caution to patients who have had prior severe systemic allergic reactions to human immune globulin.
- RhoGAM / MICRhoGAM contain a small quantity of IgA. There is a potential risk of hypersensitivity in IgA deficient individuals.
- Patients treated for Rh-incompatible transfusion should be monitored by clinical and laboratory means for signs and symptoms of a hemolytic reaction.
- Store at 2 to 8°C. Do not store frozen.
- Do not use after the expiration date printed on the syringe.

Parenteral drug products should be inspected visually for particulate matter, discoloration and syringe damage prior to administration. Do not use if particulate matter and / or discoloration. The solution should appear clear or slightly opalescent.

Use of Plasma Derived Products

RhoGAM and MICRhoGAM are made from human plasma and may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. The risk that such products will transmit an infectious agent has been reduced by screening plasma donors for prior exposure to certain viruses, by testing plasma for the presence of certain current virus infections and by using pathogen removal and inactivation techniques during the manufacturing process. All of the above steps are designed to increase product safety by reducing the risk of pathogen transmission.

Despite these measures, such products can still potentially transmit disease. There is also the possibility that unknown infectious agents may be present in such products. All infections thought by a physician possibly to have been transmitted by these products should be reported by the physician or other healthcare provider in the United States to Ortho-Clinical Diagnostics, Inc. at 1-800-421-3311. Outside the United States, the company distributing these products should be contacted. The physician should discuss the risks and benefits of these products with the patient.

ADVERSE REACTIONS

Adverse events (AE) after administration of RhoGAM and MICRhoGAM are rare.

The most frequently reported AEs are anti-D formation and injection site reactions, such as swelling, induration, redness and mild pain or warmth. Possible systemic reactions are skin rash, body aches or a slight elevation in temperature. Severe systemic allergic reactions are extremely rare. Patients should be observed for at least 20 minutes after administration. There have been no reported fatalities due to anaphylaxis or any other cause related to RhoGAM or MICRhoGAM administration.

As with any Rh₀(D) Immune Globulin (Human), administration to patients who are Rh-positive or have received Rh-positive red blood cells may result in signs and symptoms of a hemolytic reaction, including fever, back pain, nausea and vomiting, hypo- or hypertension, hemoglobinuria/emia, elevated bilirubin and creatinine and decreased haptoglobin.

RhoGAM and MICRhoGAM contain a small quantity of IgA (less than 15 µg per dose). Although high doses of intravenous immune globulin containing IgA at levels of 270–720 µg/mL have been given without incident during treatment of patients with high-titered antibodies to IgA, the attending physician must weigh the benefit against the potential risks of hypersensitivity reactions.

DRUG INTERACTIONS

Immune globulin preparations including Rh₀(D) Immune Globulin (Human) may impair the efficacy of live vaccines such as measles, mumps and varicella. Administration of live vaccines should generally be delayed until 12 weeks after the final dose of immune globulin. If an immune globulin is administered within 14 days after administration of a live vaccine, the immune response to the vaccination may be inhibited.

Because of the importance of rubella immunity among women of childbearing age, the postpartum vaccination of rubella-susceptible women with rubella or MMR vaccine should not be delayed because of the receipt of Rh₀(D) Immune Globulin (Human) during the last trimester of pregnancy or at delivery. Vaccination should occur immediately after delivery and if possible, testing should be performed after 3 or more months to ensure immunity to rubella and if necessary, to measles.

USE IN SPECIFIC POPULATIONS

Pregnancy Category C

Animal reproduction studies have not been conducted with RhoGAM or MICRhoGAM. The available evidence suggests that Rh₀(D) Immune Globulin (Human) does not harm the fetus or affect future pregnancies or the reproduction capacity of the maternal recipient.

Rh Blood Type

RhoGAM or MICRhoGAM Rh₀(D) Immune Globulin (Human) should only be administered to Rh-negative patients exposed or potentially exposed to Rh-positive red blood cells to prevent Rh immunization.

OVERDOSAGE

Repeated administration or increased dosage in Rh-negative individuals should not cause more severe or more frequent adverse reactions than the normal dose. Patients who receive RhoGAM or MICRhoGAM for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

DESCRIPTION

RhoGAM and MICRhoGAM Rh₀(D) Immune Globulin (Human) are sterile solutions containing immunoglobulin G (IgG) anti-D (anti-Rh) for use in preventing Rh immunization. They are manufactured from human plasma containing anti-D. A single dose of RhoGAM contains sufficient anti-D (300 µg or 1500 IU) to suppress the immune response to up to 15 mL of Rh-positive red blood cells. A single dose of MICRhoGAM contains sufficient anti-D (50 µg or 250 IU) to suppress the immune response to up to 2.5 mL of Rh-positive red blood cells.

The final product contains 5 ± 1% IgG, 2.9 mg/mL sodium chloride, 0.01% Polysorbate 80 (non-animal derived) and 15 mg/mL glycine. Small amounts of IgA, typically less than 15 µg per dose, are present. The pH range is 6.20–6.55 and IgG purity is ≥ 98%. The product contains no added human serum albumin (HSA), no thimerosal or other preservatives and utilizes a latex-free delivery system.

CLINICAL PHARMACOLOGY

RhoGAM and MICRhoGAM act by suppressing the immune response of Rh-negative individuals to Rh-positive red blood cells. The mechanism of action is unknown. RhoGAM, MICRhoGAM and other Rh₀(D) Immune Globulin (Human) products are not effective in altering the course or consequences of Rh immunization once it has occurred.

NOTE: For complete prescribing information, see package insert.

HENRY SCHEIN®

BRAND PRODUCTS

HENRY SCHEIN®

PREMIUM GOWNS

Tissue/Poly/Tissue, 30" x 42"
Layer of poly provides strength; layers of tissue absorb moisture. Opens front or back with attached elastic ties.

Gowns	
White	(100-2392) 50/case
Blue	(100-5728) 50/case
Peach	(100-6999) 50/case
Mauve	(100-9652) 50/case

HENRY SCHEIN®

PILLOWCASE

Tissue/Poly/Tissue

Provides linen-like softness for patient comfort and an inner poly barrier for extra protection. Strong and durable.

White, 21" x 30"	(104-9206) 100/case
------------------	--------------------------

HENRY SCHEIN®

PLASTIC CUPS

Embossed Drinking Cups with Rolled Lips

Translucent, 5 oz	(104-9869) 100/pkg
-------------------	-------------------------

HENRY SCHEIN®

PREMIUM CAPES

Tissue/Poly/Tissue, 30" x 21"

These embossed capes, with a layer of poly film sandwiched between soft absorbent tissue, provide maximum coverage where the exam requires a waist-length garment. The layer of poly provides added strength, making them suitable for most office procedures.

White	(101-6908) 100/case
Mauve	(101-3029) 100/case
Blue	(101-6599) 100/case

HENRY SCHEIN®

COTTON TIPPED APPLICATORS

Applicators are highlighted by a soft cotton tip that is absorbent and will not lint. May be used for wound care, specimen sampling, and personal hygiene.

- Quality exceeds FDA and GMP requirements: quality assurance
- Made from high-quality hardwood for superior performance
- Autoclavable or may be sterilized with gamma radiation or EtO: promotes sterility
- Non-sterile are packaged in bags of 100 with sterilization indicator strip on outside
- Latex-free

SAVE
OVER 20%**

The ONLY gloves that provide all natural therapeutic skin protection to the users' hands. CRITERION® COATS™ gloves are made with enriched colloidal oatmeal USP which is an FDA recognized skin protectant drug that soothes, moisturizes, and protects the skin.

CRITERION COATS contains all natural Colloidal Oatmeal USP which through a combination of patented and proprietary processes is added as a coating to our barrier protective gloves. During typical glove use, CRITERION COATS can provide continuous transfer and delivery of unique skin protection. Through this innovative drug delivery mechanism, CRITERION COATS can help the glove user maintain the health and integrity of the most important and effective barrier, the skin.

3M Health Care - Innovative solutions from a trusted supplier - for better health

Your Complete Resource for Skin Solutions

3M™ Kind Removal Silicone Tape

Provides reliable securement, kind removal, and gentle wear without compromise

- Security: Offers reliable and constant fixation, remains in place until you decide otherwise
- Comfort: Removes cleanly, without disrupting fragile skin layers or causing patients undue pain
- Ease of use: Can be repositioned and neatly torn by hand

3M™ Coban™ LF Latex Free Self-Adherent Wrap with Hand Tear

Coban LF Wrap with hand tear has what it takes to be easy on patients and clinicians

- Scissors-free application reduces risk of infection for patients; can be easily and cleanly torn by hand
- Comfortable: soft, breathable, lightweight, conformable

3M™ Steri-Strip™ Antimicrobial Skin Closures (Reinforced)

Offers wound closure and support with a special adhesive containing Iodophor

- Iodophor incorporated in the adhesive
- Less risk of infection vs sutures and skin staples

3M™ Tegaderm™ +Pad Film Dressing with Non-adherent Pad

Dress for Success - Trusted Performance and Reliability

- A bacterial and viral* barrier—helps prevent external bacteria and contaminants from entering the site
- A waterproof barrier—patient may bathe or shower without removing dressing

Please contact your Henry-Schein sales representative for details on these products from 3M.

* In vitro testing shows that the transparent film dressing provides a viral barrier from viruses 27 mm in diameter or larger while the dressing remains intact without leakage.

3M

Pick how you click.

Flu seasons are unpredictable, using a safety hypodermic needle shouldn't be.

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness,* and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits *every* clinician's style.

Plus, SurGuard®3 has the sharpest needles among major brands tested.*

- 10% sharper than similar needles from other leading brands
- More comfortable injections for patients

Bottom line: No matter what you're looking for in a needle, you're looking for SurGuard®3.

TERUMO MEDICAL PRODUCTS

3M™ Tegaderm™ Transparent Film Dressings, Frame Style

Transparent film dressings designed for protecting skin and wound sites while allowing easy monitoring of wounds without the need to remove the dressing. Unique sacral shape is designed for challenging and difficult-to-dress areas. Dressings conform to the body and flex with skin for greater patient comfort. Waterproof dressing provides a bacterial and viral barrier to outside contaminants and allows the patient to shower. Breathable film allows moisture vapor and oxygen exchange while providing a moist wound environment for enhanced healing. Dressings with label area have a built-in documentation label that is easy to write on.

HENRY SCHEIN® WOUND CLOSURE STRIPS

Latex-free

Adhesive wound closures with an exceptionally porous, spun-bond fiber backing include bilateral nylon filaments for high tensile strength. Hypoallergenic, medical-grade adhesive affords excellent adhesion, yet remains gentle to the skin. To be used in addition to or in place of sutures. Each size is in a color-coded package for quick and easy size identification. Latex-free.

- **Highly aggressive adhesive properties:** Resistant to moisture, with proven superior longevity, on the patient, to popular brands
- **Bilateral nylon filaments:** Provide resistance to stretching while maintaining closure and high tensile strength
- **Hypoallergenic:** Designed for patient comfort and longer-term exposure
- **Porous:** Allows breathing for advanced healing and moisture control

HENRY SCHEIN® TOPICAL SKIN ADHESIVE

Sterile, 0.5-mL Single-Patient-Use Plastic Ampules. FDA-approved liquid adhesive consists of n-butyl-2 cyanoacrylate. Available in both regular (translucent) and blue formulations. Both polymerize in seconds upon being exposed to water or water-containing substances such as human tissue.

- Forms a strong bond that seals wounds quickly
- Inhibits growth of bacteria
- Provides a precise, controlled application
- Won't clog or dry out when opened

FLASH YOUR CONFIDENCE

With SurFlash® safety catheters—
clinically proven to increase first-stick success by up to 25%¹

A better experience for clinicians and patients

As the only safety IV catheter with a double-flash feature that verifies both needle **and** catheter placement, SurFlash® improves first-stick success.

SurFlash® catheters reduce needlestick injuries, blood exposure, *and cost* (because of fewer wasted catheters). With its new pressure rating, proprietary safety valve and bevel-up indicator, SurFlash® has it all!

For more information, contact your Henry Schein representative.

TERUMO MEDICAL PRODUCTS

HENRY SCHEIN® DISPOSABLE VAGINAL SPECULA

Recommended for routine gynecological exams.

- Allows examination of vaginal mucosa at a 360° angle without rotation
- Provides wide range of adjustability (angular and elevation adjustments)
- One-handed manipulation for ease of operation
- Self-holding in various opening positions
- Decreases risk of contamination
- If needed, apply lubrication for better comfort during examination
- Made of hard, clear, nontoxic, high-strength plastic resin

HENRY SCHEIN® DOUBLE ENDED EAR CURETTES

These innovative, single-use currettes have shaped tips—large and small paddle/spoon ends and large and small circle/loop ends (commonly referred to as the buck style)—on opposing ends. This allows the clinician to use a single device for removing substantial impaction areas (large ends) and clean the remaining cerumen particles (small ends) in the most common ear, nose, and throat (ENT) procedures.

- Single device for 2 uses: saves time and money
- Available in both paddle and loop ends
- Patented no-roll triangular handle with ridges
- Comfortable and secure grip
- Orientation mark allows alignment of tip from the outside of the ear
- Antimicrobial plastic
- 7" long
- Made in the USA

Currettes 100/box

Specify:

Paddle (900-7430)
Loop (900-7429)

HENRY SCHEIN® TONGUE DEPRESSORS

Highly polished and splinter-free. Designed for oral use or topical application.

- Sterilizable by autoclave, gamma radiation, or EtO: promotes sterility
- White birch has a high tensile strength: resists breakage
- Available in sterile and non-sterile packaging

Non-sterile, Junior 5½"
(100-0758) 500/box
Non-sterile, Regular 6"
(100-2416) 500/box
Sterile, Individually Wrapped, Regular 6"

INTRODUCING

An Easier Way to Order Medication Samples

The Henry Schein Rx Samples Service is a free and secure online service that enables 500,000 eligible prescribers* to order medication samples — easily and conveniently. This service is sponsored by leading pharmaceutical manufacturers, and is designed to meet your practice and patient sampling needs.

The Henry Schein Rx Samples Service:

- **Consistently receive your FULL allocation** of select medication samples
- Is sponsored by major pharmaceutical manufacturers, so there is no expense to the practice
- Offers 100% compliance with pertinent regulations
- Ships samples directly to your practice via UPS for arrival within 4–6 business days
- Offers **Recurring Request** that makes re-ordering easy and keeps you in control of your inventory

Getting started is easy — samples are available now!

Go to www.hsrxss.com and click the "Check Eligibility & Register" button. Activate your account by completing basic user and shipping information. Once registration is complete, you can place your first order immediately.

Need assistance getting started or with placing your order?

E-mail us at: henryscheinRxSamples@emedsample.com or call us toll-free at: (866) 772-1580.

*Only eligible prescribers are able to enroll and order samples through the Henry Schein Rx Samples Program.

Disposable Cryosurgical Device

Clinically effective direct spray of liquid nitrous oxide (-89°C/ -127°F) in a convenient and economical device.

- Colder and more effective than canister-based disposable systems
- Precise, concentrated spray, no accessories required
- Usually removes lesions in a single office visit
- Average treatment time is 10 seconds
- 240 seconds (4 minutes) total treatment time per unit
- FDA approved for broad range of non-malignant lesions
- Unit does not contact patient
- Shelf life of 2 years un-activated, at least 6 months activated
- Non-flammable, disposable
- High revenue stream, pays for itself in 3 treatments

CryOmega is a registered trademark of CryoConcepts, LP.
U.S. and International Patents Pending.

378-0286 CryOmega

One disposable cryosurgical unit containing a 16g nitrous oxide (N₂O) cartridge

NEW! Now available in a Twin Pack!

893-0011 CryOmega Twin Pack

Two disposable cryosurgical units each containing a 16g nitrous oxide (N₂O) cartridge

PRO PLUS SERIES PALM ANEROID

Latex-Free

This revolutionary palm-style manometer has an integral latex-free bulb and trigger-style air release valve for one-hand convenience.

Features:

- Precision-crafted, 300mm-Hg, CE-marked, no-pin stop movement tested to 50,000 cycles
- Movement housed in a zinc safety cage for unsurpassed durability
- Ambidextrous infinite control trigger-release air valve
- Nylon cuff with proprietary size guide marking system, to prevent mis cuffing
- Dip-molded latex inflation bladder withstands heavy use
- Quick-release Luer-slip connector
- Complete with leatherette carrying case

Assurance 50° "Fade-Resistant" Papers

Single Channel, Red Grid

Unique line of thermal recording media. Look and feel is similar to standard thermal charts, but difference is in acid-free base paper and patented chemical thermal coatings. Combination of these 2 elements works to deliver 50 years of ECG image life without worry or fading. Thermal chart contaminants such as UV light, PVC, alcohol, adhesive tape, and electrode creams are no longer of concern. No special care or handling is required. Guarantee clear, indelible original records, year after year.

CareCenter MD™

This multimodality PC-based wireless diagnostic workstation with both PC ECG and PC stress test modalities is designed to make your workflow much easier. A scalable workstation with one platform for both ECG and stress test means no re-entry of patient data. Wireless data acquisition means test safety, comfort, and confidence for your patients and staff. The modern, flexible user interface uses the same simple, one-button navigation for all modalities and provides access to complete test data across the network; CareCenter MD Online allows for remote live consultations—only from Cardiac Science. In addition, a single, shared patient database means results are available throughout your network, with or without an electronic medical records system (EMR). Modify and save screen views on the fly. Select the report format that works best for you. Save, review, and combine permanent patient records in your EMR via HeartCentrix or HL7.

CP 150™ Electrocardiograph

Combines simplicity with speed using a unique touch-screen display and keyboard for improved accuracy. To meet the needs of fast-paced environments, take quick ECG readings with the touch of a button. And, with a range of advanced connectivity features, it will help improve your practice work flow by sending, managing, and sharing patient data with systems inside or outside your facility.

- 7" full-color touch-screen display for fast and easy entry of accurate patient information
- Instant-on feature powers the device up quickly
- Advanced filters for optimal ECG trace quality ensure accurate readings
- 3-lead ECG preview
- Optional adult and pediatric MEANS ECG interpretation software offers a second opinion
- Battery operation for portability
- Stores up to 100 test results on the device, which can be transferred to a USB flash drive

ECG/HOLTER/VITAL SIGNS MONITOR

Digital IQecg™

Makes your job easier with a range of reviewing and editing tools to help increase productivity and efficiency. At the touch of a button, you can capture an abnormal ECG as it appears on screen, enhance the diagnosis with tools like zoom and electronic calipers, quickly edit statements, and perform serial comparison.

Features include:

- Lightweight, portable design, weighing less than 11 oz
- View and monitor live, 12-lead ECG in selectable formats on screen
- Interpret and analyze data for neonate, pediatric, and adult patients via the Midmark 12-lead Resting Electrocardiogram Analysis Program
- Review and edit ECG results on screen with free text or customizable quick-edit statements
- Perform serial comparison with overlay of up to 4 ECG tests
- Save time and reduce data-entry errors by populating patient information directly from your EHR/EMR software
- Facilitate paperless office strategy: eliminate costs of thermal paper and the hassles of scanning and filing patient charts

IQholter™ Recorder

Midmark IQholter™ Recorder is small and lightweight, only 2.8 oz. Well-lit display and intuitive keypad make clinician navigation and menu control easy. On-screen leads and channel identification for speed and simplicity during patient hookup. Automatic startup self-test with warning alarm ensures reliable recording. 5-lead hookup for 3-channel recording; 7-lead option available. 24-hour standard recording 48- and 72-hour recording capabilities available. Removable Secure Digital (SD) card allows for immediate patient turnaround.

IQholter™

IQholter™ offers color-coded arrhythmia events to identify different ECG morphologies, and comprehensive reports with auto narrative summary to effectively reveal important test data and statistics. Ability to edit and review test results and full disclosure locally or on the network without printing.

IQholter™ EX

IQholter™ EX provides the ability to preview and adjust criteria settings to match patient's recording before the analysis and identifies atrial fibrillation (AF) events based on parameters set by the clinician. Smart Page Scan highlights specified events and reveals entire episodes at a glance. Arrhythmia Templates with Intelligent Sorting facilitate quick reviews and edits with QT and QTc analysis for identifying prolonged intervals.

IQholter™ EP

IQholter™ EP offers all the standard features of IQholter™ and IQholter™ EX with pacemaker detection to identify single and dual-chamber paced beats for noncaptures and sensing failures. Automatic pacemaker detection eliminates setting changes between patients.

WelchAllyn®

Thermoscan® Pro 4000 Ear Thermometer

Offers speed and accuracy for all types of patients. Exclusive ExacTemp technology provides an active user feedback system to ensure proper positioning and improved accuracy.

- Improved accuracy and repeatability through a preheated probe tip and sensor
- Automatic probe cover eject button for quick and easy disposal of used probe covers
- Exclusive ExacTemp technology provides an active user feedback light, guiding proper probe positioning and improved accuracy
- Preheated probe tip minimizes cool-down effect experienced when taking repeat temperatures, improving both accuracy and repeatability
- Probe cover detection system improves accuracy by ensuring precise infrared heat transfer
- Innovative security features reduce the occurrence of theft in the hospital environment (only available with Base Station)

FLO-MED™ 1100

Precision Uroflowmetry System

Simple, noninvasive diagnostic screening device used to calculate the flow rate of urine over time. This aids in diagnosis of bladder and sphincter function.

- Automated, digital uroflowmetry device
- No catheterization necessary
- One-touch operation
- Range of height: 47" at full extension, 36" fully recessed
- Easy assembly
- 1-year warranty
- 3 simple configurations: wireless via router, wireless USB adapter or hardwired to a PCL5 printer
- Clear graphic report of patient results
- Easy diagnosis using accepted graph samples
- Produces computed results for: Maximum Flow, Average Flow, Total Volume, Total Time and When Peak Occurred
- HTML or PDF of report easily inserted into EHR—no connectivity required
- CPT® 51741† with appropriate ICD-9
- 33 possible ICD-9 codes
- Female adapter sold separately

System Requirements:
Compatible with Windows 7, XP & Vista operating systems

Hardwire-compatible with PCL5 printers
